RE: Drainage, SWM, ESC Approval

We have reviewed the drainage, stormwater management (SWM), and Erosion Sediment Control computations, plans, and project site impacts within the State's Right of Way (ROW) provided with ***Final Submission No. 2, submitted 12/13/2022.*** The designer has satisfactorily addressed our previous comments. Currently, we have no further comments and recommend approval of the drainage and SWM within DeIDOT's Right of Way. Any changes to the SWM and drainage design following the above referenced submittal will negate this approval pending additional review and approval by DeIDOT.
